

Healing / Regeneration / Anti-Aging

L-arginine

L-arginine is a vital amino acid that plays a role in a number of physiological functions in the body, but is best known for its cardiovascular benefits. In the body, L-arginine is converted to nitric oxide, which relaxes the blood vessels and regulates blood vessel tone and flexibility. This reduces stress on the heart, improves circulation, and lowers blood pressure. Our L-arginine is pharmaceutical grade and not made with dangerous chemicals like hydrochloric acid.

L-citrulline

The amino acid citrulline is metabolized to yield more L-arginine, which in turn provides additional nitric oxide. Citrulline helps to optimize blood flow and oxygen throughout the body and promote healthy energy level.

Vitamin D3

Vitamin D3 is no longer classified as a vitamin, but rather a hormone. This vitamin has long been known to aid in calcium absorption, but new research shows that vitamin D3 also plays a role in healthy cardiovascular function and supports a healthy inflammatory response.

Resveratrol

This ingredient is high in antioxidants, anthocyanins, and polyphenols, which help protect the heart and reduce LDL oxidation.

Pomegranate

Pomegranate contains superior antioxidants, known as punicalagins and ellagic acid. Pomegranate inhibits LDL oxidation, supports arterial wall strength, and enhances the activity of the enzyme responsible for converting L-arginine to nitric oxide.

Vitamin K2

This vitamin keeps calcium in the bones and out of the arteries.

Folic Acid, Vitamins B6 and B 12

These ingredients work together to naturally decrease homocysteine levels and relieve stress.

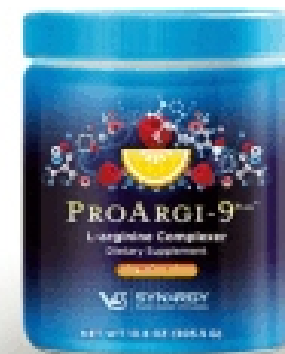

D-ribose

D-ribose is a naturally occurring sugar that has been extensively studied for its ability to enhance the recover of energy compounds in heart cells. It protects against cell damage in the heart and helps rejuvenate heart muscles.

Xylitol

This ingredient is a low glycemic sweetener that occurs naturally in the body. Unlike other sweeteners, xylitol has been shown to promote saliva production providing protection against tooth decay.

A Sure Way to better Health

ProArgi-9 Plus

A natural nutraceutical supplement that combines the latest technology and superior ingredients to enhance heart health, regeneration and anti-aging.

Formulated in collaboration with leading L-arginine researchers and validated by Nobel Prize research on Nitric Oxide.

Dr. Joseph Prendergast ProArgi9 plus formulator

Awarded the American Diabetes Association's highest honor, "Father of the Year" 2008 for saving diabetic lives.

What can ProArgi9 do for me?

Do you have high blood pressure?

ProArgi9 plus reduces blood pressure by relaxing and healing inflamed arteries. It cleans out plaque so your blood flows without restrictions. In the HDHI study patients that were already using drugs to control high blood pressure, further reduced systolic blood pressure by 13% and diastolic BP by 17% with ProArgi9 plus. These patients were able to lower or eliminate their drug treatment with ProArgi9 plus.

"My grandfather, father, uncle and cousin all died ages 49-66 from heart disease. I too had high blood pressure, shortness of breath and chest pains. Since I began using ProArgi9 plus, my blood pressure has come down to 106/64 with a resting plus of 56." John Hewlett, MT

Do you have high cholesterol? High triglycerides?

High cholesterol is a symptom of inflamed arteries. L-arginine heals inflamed arteries, rapidly normalizing cholesterol levels and significantly reducing triglycerides.

"My triglycerides fell 95 points in the first 30 days and my HDL came up while my LDL fell. My blood pressure came down to 116/78. I couldn't be happier." Scott Norton, UT

Do you have neuropathy, pain or numbness in your legs or arms? Do you have poor circulation?

L-arginine relaxes your arteries and veins so your blood flows freely. Doctors call this vasodilation. In the HDHI study of high-risk heart patients, ProArgi9 plus increased blood flow to the legs by 16% measured by the brachial ankle index.

"After using ProArgi9 for 60 days my toes that had turned black cleared up and the toe nails that had fallen off began to grow back. The doctors had told me I would have to live with the pain in my legs, but the pain simply went away with ProArgi9." Jay Whitmore, AZ

Do you have shortness of breath or pulmonary hypertension?

L-arginine increases circulation so effectively that more oxygenated blood is delivered in the lungs.

"It was not surprising to see our pulmonary hypertension patients no longer needing supplemental oxygen. It's one of the benefits of using ProArgi9 plus." Dr. Siva Arunasalam - Cardiologist Cedars-Sinai

Bury Diseased Thinking Now! Renew Your Mind

Do you have bone loss?

In Dr. Prendergast's practice of 18 years and over 8,000 patients, osteoporosis and bone loss is no longer found after following a ProArgi9 plus protocol, even though most of his patients are diabetic. In the HDHI study Vitamin D3 levels increased 183%

"I have osteoporosis and I've been looking for a way to protect my bones after 4 years of Boniva and Actonel. ProArgi9 works for me." Patti Zurci, UT

Do you have diabetes?

Dr. Prendergast has treated thousands of diabetics with the ProArgi9 plus formula in his endocrinology practice. ProArgi9 plus makes the body much more sensitive to glucose, so diabetics can reduce their insulin dose and in many cases stop taking insulin all together. Diabetics suffer from poor circulation and heart disease conditions, but with ProArgi9 plus these problems are greatly reduced and many times eliminated.

Do you have ED erectile dysfunction?

ED is sometimes an indication of poor circulation and is often a sign of heart disease. Viagra works by inhibiting a chemical that destroys Nitric Oxide. L-arginine simply creates abundant Nitric Oxide to get the same result without Viagra's negative side effects.

Do you have kidney failure?

"We've had patients with as little as 13% kidney function recover with ProArgi9 plus." Dr. Prendergast

Ask Me How Proargi9 Can Help You with Whatever Health Concerns You Are Having or a Family Member Is Having.

Learn the science of lymphology, and step up to quantum health & healing you DO NOT HAVE A DISEASED you are having cellular malfunctions because you broke the laws of health. ProArgi9 Plus is not intended to diagnose, treat, cure or prevent any disease, however, it can help you reverse your symptoms that YOU associate with a disease.

I am Dr. Karen Davis-Foulks dba Dr. Khadijah AbdulMalik and I am here to help you take back control of your healthcare. Schedule a nutritional consultant and get ProArgi9 all for \$150.00! Visit www.4celllife.com to learn more and order ProArgi9 plus. Visit www.youtube.com/kdavisf

Dr Prendergast received this honor because after 18 years specializing in high risk diabetes cases, his more than 8,000 patients have not experienced one fatal heart attack, stroke, or amputation when following his arginine therapy.

- Not one stent or bypass
- No amputations
- Not one fatal heart attack
- Not one fatal stroke

One of the reasons for this is ProAri9 plus. Dr. Prendergast developed ProArgi9 plus in the quest to combat the ravaging complications of diabetes on the cardiovascular systems of his patients. He found that ProArgi9 plus reversed the symptoms of all circulatory and cardiac issues with amazing wonder side effects.

- reduces blood pressure
- significantly reduces triglycerides
- increases HDL (good cholesterol)
- decreases LDL (bad cholesterol)
- relieves neuropathy in legs and feet
- dramatically reduces Pulmonary Hypertension
- reduces CASP scores
- reduces glucose levels
- reduces creatinine levels (measure of kidney distress)
- reduces c-reactive protein (indicates inflamed arteries)
- dramatically increases vitamin D and magnesium
- significantly reduces albumin & bilirubin levels (a measure of liver health)

Dr. Prendergast has been an Endocrinologist and researcher for over 35 years. He is Board Certified in Internal Medicine as well as Endocrinology and Metabolism and served his residency at the University of California, San Francisco. Dr. Prendergast is a member of over a dozen national medical associations and has published over 40 medical articles in well-known publications including JAMA "journal of American medical Association", "The New England Journal of Medicine" and "Diabetes Care."
